Biodegradable polymer blends based on corn starch and thermoplastic chitosan processed by extrusion

Biodegradable polymer blends based on corn starch and

NO_x trapping followed by temperature-programmed desorption (TPD) for 0.3 wt% Pd on H-BEA zeolite with Si/Al = 12.5 in the presence of 14% O₂ in the gas stream (in the absence of water) is also shown in Fig. 1. The presence of oxygen clearly leads to the promotion of NO uptake by Pd/BEA: NO/Pd ratio increases to 20.5. NO release in this case starts above 130 °C, with the release temperature ...

Palladium/Beta zeolite passive NO_x adsorbers (PNA)

Academia.edu is a platform for academics to share research papers.

EasySpin, a comprehensive software package for spectral
