The gas mask is a mask used to protect the user from inhaling airborne pollutants and toxic gases. The mask forms a sealed cover over the nose and mouth, but may also cover the eyes and other vulnerable soft tissues of the face. Most gas masks are also respirators, though the word gas mask is often used to refer to military equipment (e.g. field protective mask).

Gas mask - Wikipedia

Liquefied natural gas (LNG) is natural gas (predominantly methane, CH₄, with some mixture of ethane C₂H₆) that has been cooled down to liquid form for ease and safety of non-pressurized storage or transport. It takes up about 1/600th the volume of natural gas in the gaseous state (at standard conditions for temperature and pressure). It is odorless, colorless, non-toxic and non-corrosive.

Liquefied natural gas - Wikipedia

Gas prices are threatening industries and jobs, while angry landholders and local communities stand in the way of increasing supply for both domestic consumers and exports – what now?
