A crucible is a ceramic or metal container in which metals or other substances may be melted or subjected to very high temperatures. While crucibles historically were usually made from clay, they can be made from any material that withstands temperatures high enough to melt or otherwise alter its contents.

Independent rankings. Chemistry at Kent scored 90.1 out of 100 in The Complete University Guide 2019.. In the National Student Survey 2018, over 91% of final-year Chemistry students who completed the survey, were satisfied with the overall quality of their course.

Chemistry - BSc (Hons) - Canterbury - The University of Kent

Abstract structure. Abstracts must be structured and written in five paragraphs: Background, Purpose, Materials and Methods, Results, Conclusions. This structure of an EAHP congress abstract has to be strictly adhered to.

Abstract | European Association of Hospital Pharmacists

The ion source is the part of the mass spectrometer that ionizes the material under analysis (the analyte). The ions are then transported by magnetic or electric fields to the mass analyzer.. Techniques for ionization have been key to determining what types of samples can be analyzed by mass spectrometry.

Mass spectrometry - Wikipedia

B.S. in Chemistry. The majority of undergraduate degrees awarded by the Department of Chemistry are Bachelor of Science degrees. This degree program provides the most appropriate preparation for further graduate study and for industrial positions in research and development or analytical chemistry.

Department of Chemistry < Carnegie Mellon University

The program. The Chemical and Environmental Technology diploma program offers the student a broad background in technology and skills that can be applied to many industries.

BCIT : : Chemical and Environmental Technology (Analytical

The Department of Chemistry offers a Bachelor of Arts degree in Chemistry, a Bachelor of Science degree in Chemistry, and a Bachelor of Science degree in Biochemistry, as well as a minor in Chemistry.

Department of Chemistry < The University of Texas at San

An Engineer's Perspective By Ronald Voisin, A couple decades ago an international team of volcanologists arranged for the tag-on launch of a first generation orbiting gravimeter in order to study volcanism (the legitimate auspicious being pure scientific endeavor). While that intended function was successful, a much more important capability unexpectedly came to pass.
