Response to Intervention in Elementary-Middle Math

Online homework and grading tools for instructors and students that reinforce student learning through practice and instant feedback.

WebAssign

The question is whether or not, for all problems for which an algorithm can verify a given solution quickly (that is, in polynomial time), an algorithm can also find that solution quickly. Since the former describes the class of problems termed NP, while the latter describes P, the question is equivalent to asking whether all problems in NP are also in P.

There are many unsolved problems in mathematics. Some prominent outstanding unsolved problems (as well as some which are not necessarily so well known) include 1. The Goldbach conjecture. 2. The Riemann hypothesis. 3. The conjecture that there exists a Hadamard matrix for every positive multiple of 4. 4. The twin prime conjecture (i.e., the conjecture that there are an infinite number of twin ...

The Problems of the Month are designed for school-wide mathematical investigations. You may want to start by reviewing the Problems of the Month Implementation Guidelines (pdf), Scoring Guidelines (pdf), and an index of the mathematical concepts (pdf) addressed by each problem. Feel free to use these sample letters for parents (.docx) and for teachers (.docx).

The International Mathematics Olympiad (IMO, also known as the International Mathematical Olympiad) is an annual mathematics competition for high school students [IMO Article in Wikipedia]. It is one - in fact, the oldest - of the International Science Olympiads. The first IMO was held in Romania in 1959. The problems come from various areas of mathematics, such as are included in math curricula ...
