A few multi-metal-based systems were created to probe the regulation mechanism in electrocatalytic reactions. This work investigates a set of unique models of electrocatalysts based on the supertetrahedral metal sulfide nanoclusters with tunable multi-metal (Mn, Co, Zn) sites, which show an obvious synergistic effect on enhancing the electrocatalytic activities in hydrogen evolution reaction.

x Frailty is a syndrome of vulnerability and physical decline with aging that increases risk for disability, hospitalizations, and death. To date, interventions for frailty have primarily focused on exercise and/or nutritional interventions, many of which show improvement in frailty-related characteristics, such as gait speed and lower extremity strength and function.
