11. SAFETY FIRST - Chemistry experiments should be done in a controlled, carefully supervised environment such as a school lab (laboratory) or learning center lab unless specifically designed to be safe as a home experiment. Children must be constantly supervised by informed responsible adults educated in lab safety. Never work alone. If you plan on doing any experiments of any kind, pay ...

In chemistry, a mixture is a material made up of two or more different substances which are mixed. A mixture refers to the physical combination of two or more substances in which the identities are retained and are mixed in the form of solutions, suspensions and colloids.. Mixtures are one product of mechanically blending or mixing chemical substances such as elements and compounds, without ...

Metabolite profiling based on a specific class of metabolites promises a number of additional opportunities to unravel the complexity of biological mixtures and detect a larger pool of quantifiable metabolites. Considering that biological samples such as blood contain over 5000 metabolites, and that detection of all these metabolites in a single measurement is out of reach for current ...
