Research comprises "creative and systematic work undertaken to increase the stock of knowledge, including knowledge of humans, culture and society, and the use of this stock of knowledge to devise new applications." It is used to establish or confirm facts, reaffirm the results of previous work, solve new or existing problems, support theorems, or develop new theories.

Fermat's Last Theorem, formulated in 1637, states that no three distinct positive integers a, b, and c can satisfy the equation $a^n + b^n = c^n$ if n is an integer greater than two ($n > 2$).. Over time, this simple assertion became one of the most famous unproved claims in mathematics. Between its publication and Andrew Wiles' eventual solution over 350 years later, many mathematicians and amateurs ...

The principle of The Three Pillars of Sustainability says that for the complete sustainability problem to be solved all three pillars of sustainability must be sustainable. The three pillars are social, environmental, and economic sustainability. The flaw in the Brundtland definition of sustainability arose in a short term effort to make the social pillar stronger as the world's top priority.
