

SAP SOLUTION MANAGER 71

sap solution manager 71 pdf

In SAP Solution Manager 7.2, you have the option of using the central Change and Transport System (cCTS) infrastructure when setting up change cycles in Change Request Management (ChaRM) or Quality Gate Management (QGM). This guide explains how to set up a cCTS landscape to be able to use the ChaRM and QGM features based on central CTS.

How To... Set Up cCTS for ChaRM and QGM on SAP Solution

SAP HANA is an in-memory, column-oriented, relational database management system developed and marketed by SAP SE. Its primary function as a database server is to store and retrieve data as requested by the applications. In addition, it performs advanced analytics (predictive analytics, spatial data processing, text analytics, text search, streaming analytics, graph data processing) and ...
