In computer science and operations research, a genetic algorithm (GA) is a metaheuristic inspired by the process of natural
selection that belongs to the larger class of evolutionary algorithms (EA). Genetic algorithms are commonly used to generate
high-quality solutions to optimization and search problems by relying on bio-inspired operators such as mutation, crossover
and selection.

Learning Algorithms Through Programming and Puzzle Solving (The book + PDF optimized for mobile devices)

Learning... by Alexander S. Kulikov et al. [PDF/iPad/Kindle]

Algorithm design refers to a method or mathematical process for problem-solving and engineering algorithms. The design of
algorithms is part of many solution theories of operation research, such as dynamic programming and divide-and-
conquer. Techniques for designing and implementing algorithm designs are also called algorithm design patterns, such as the
template method pattern and decorator ...
