Text analytics. The term text analytics describes a set of linguistic, statistical, and machine learning techniques that model and structure the information content of textual sources for business intelligence, exploratory data analysis, research, or investigation. The term is roughly synonymous with text mining; indeed, Ronen Feldman modified a 2000 description of "text mining" in 2004 to ...

The Personality Project's Guide to R

Rollwage et al. examined whether radical beliefs are linked to alterations in metacognition in a low-level perceptual task. Radical participants—on both ends of the political spectrum—showed reduced insight into the correctness of their choices and less sensitivity to post-decision evidence, indicating a generic resistance to revising mistakes.
