Physics Pages. This site contains my notes and solutions to various problems in some textbooks in physics and related fields. The site is fairly technical, in that I use whatever mathematics is required to explain the various topics.

In physics, a field is a physical quantity, represented by a number or tensor, that has a value for each point in space-time. For example, on a weather map, the surface temperature is described by assigning a real number to each point on a map; the temperature can be considered at a fixed point in time or over some time interval, if one wants to study the dynamics of temperature change.

Results of a critical review of 237 sources in the area of thermal energy storage using PCMs were presented by Zalba et al. .In this work, the main attention also was on thermo-physical properties of PCMs which could be used in solar applications.

General relativity (GR, also known as the general theory of relativity or GTR) is the geometric theory of gravitation published by Albert Einstein in 1915 and the current description of gravitation in modern physics. General relativity generalizes special relativity and Newton's law of universal gravitation, providing a unified description of gravity as a geometric property of space and time ...

Physical Geology, by Brian J. Skinner and Stephen C. Porter A well written introductory textbook on physical geology with lots of figures. The Solid Earth - An Introduction to Global Geophysics, by C.M.R. Fowler This book has nothing to do with quartz but is about the inner workings of the planet earth, and it clearly addresses expert readers and undergraduate students of geology.

In wire bonding, the attachment of a bond wire to a bond pad is realized by a joining process. The energy input for the joining process is a combination of force, temperature and/or ultrasonics.

En la atmósfera, el mantenimiento del equilibrio entre la recepción de la radiación solar y la emisión de radiación infrarroja devuelve al espacio, aproximadamente, la misma energía que recibe del Sol. Esta acción de equilibrio se llama balance energético de la Tierra y define la temperatura media del planeta.
