INFINITE ENERGY is the international magazine for Cold Fusion and New Energy Technologies. It is a technical magazine
with outreach to the general public, providing material of interest to all people. It includes some highly technical papers and
patents. It also includes non-technical articles and news on developments in the field, as well as the social, political, and
economic implications of ...

New Energy FAQ

Thermal conduction is the transfer of heat (internal energy) by microscopic collisions of particles and movement of electrons
within an organ. The microscopically colliding particles, that include molecules, atoms and electrons, transfer disorganized
microscopic kinetic and potential energy, jointly known as internal energy.
