Sepsis occurs when the body reacts to an infection and releases chemicals that cause inflammation as well as organ failure. Early detection of sepsis, with the timely administration of appropriate fluids and antibiotics, appear to be the single most important factors in reducing morbidity and mortality from sepsis.

Early Detection and Treatment Of Sepsis | Patient Safety

Impairment is a problem in the function of a body part. It can be either temporary or permanent. When it is temporary, the employee is unable to work while recovering from the injury. When the impairment is permanent, the employee retains a residual of the injury after the medical treatment has ended.
